

At 100 User with 1 user per second:

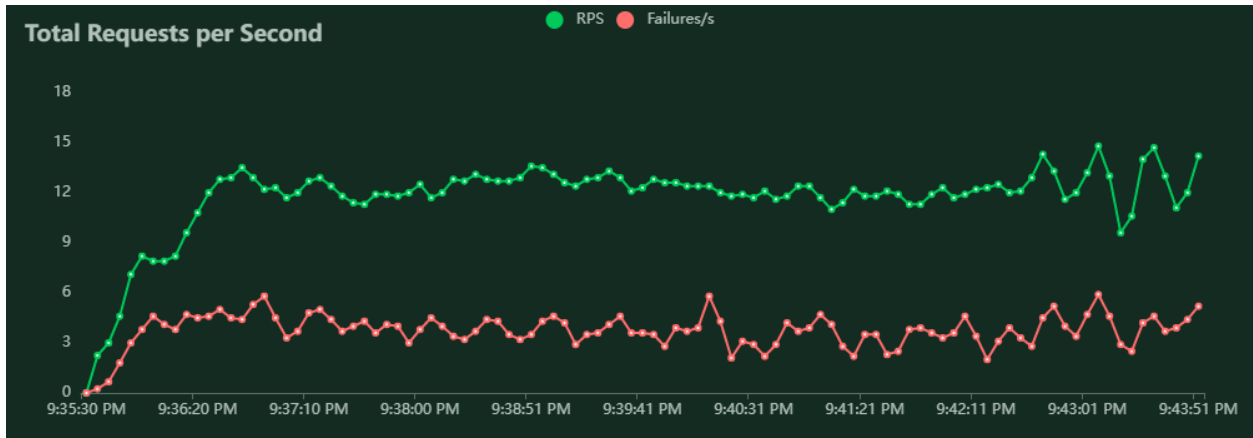

- Response time gets significantly slower at 75 users

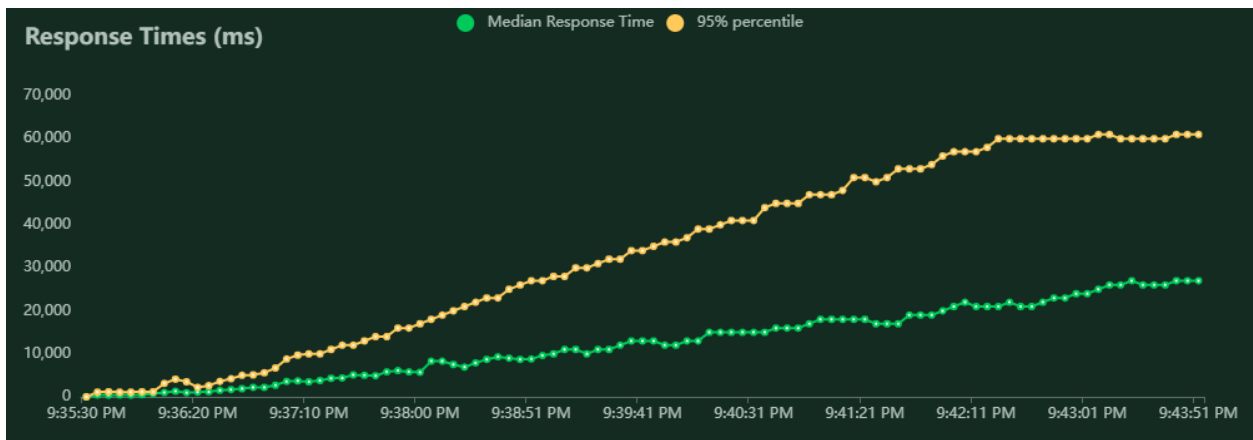

- Sign in does not fail for the 100 users
- Sign up fails at 30 users with HTTP.status_code 409 (failure due to conflict)

At 500 users with 1 user per second:

- Failure and success fluctuated deeply approaching 500 users
- Sign up failed all requests and a HTTP.status_code 509 is shown (site is receiving too much traffic than the host can allow)

- Response time increased linearly
